UX Design Projects

K&A Morrisey Cleaning Services

- Role: UX Designer, Logo Designer, Developer
- Tools: Figma, Inkscape, HTML, SASS, JavaScript, VueJS, Vuetify
- Description:

K&A Morrisey Cleaning Services is a commercial janitorial business that is local to Sampson County. This site is a redesign of the previous website to better showcase the company janitorial services offered and the areas that the company will serve.
- Design Process:

Created a persona to empathize with the end user. Generated competitive audits of competitors around the Sampson County area. Produced low-fidelity and high-fidelity wireframes. Conducted an informal user interview. Designed logo using Inkscape. Developed site using VueJS.

Torch Mentorship Network

- Role: UX Designer, Logo Designer
- Tools Used: Figma, Inkscape
- Description:

Torch Mentorship Network is an online service that helps students connect with a mentor during their college studies. This project was to design both a mobile app and responsive website for a career mentorship service to help college graduates with a better solution to connect with fellow mentors in their career field.
- Design Process:

Created a persona to empathize with the end user. Created user maps to find pain points and improvement opportunities. Generated competitive audits of online competitors. Produced low-fidelity and high-fidelity wireframes for both website and mobile applications. Designed logo using Inkscape.

LemonBranch DIY Tutorials

- Role: UX Designer, Logo Designer
- Tools Used: Adobe XD, Inkscape
- Description:

The LemonBranch Network is a company that hosts various online tutorials to view; and also allows members to create their own tutorials. The idea here is to streamline a way for users to find and view tutorials based on their searches.
- Design Process:

Created a persona to empathize with the end user. Generated competitive audits of competitors online. Produced low-fidelity and high-fidelity wireframes. Designed logo using Inkscape.
