Kelvin Morrisey Jr

UX Engineer • UX/UI Designer

UX Designer with a background in front-end development and over 10 years of experience delivering digital experiences within healthcare and enterprise environments. Skilled in user-centered design, interaction design, wireframing, prototyping, user flows, and translating complex business requirements into intuitive solutions.

Selected UX Case Study Entries

Prints Webcomics

https://kelvin-m.com/#/view/prints

Site to host and share webcomics. Created an improved user interface when viewing webcomics for both desktop and mobile devices. Maintained scalable and responsive design for future updates and improvements.

K&A Morrisey Cleaning Services

https://kelvin-m.com/#/view/ka

Created a responsive site that advertises janitorial business with accessible methods of contact. Simplified navigation to one-page format for each section.

Torch Mentorship Network

https://kelvin-m.com/#/view/to

Created mockups for a mobile app and web site to help network students with mentors. Added consistent branding across each view with simple workflows for students and mentors accessing the site.

Experience

Digital Applications Developer

Blue Cross NC - *Oct 2019 - Present*

Developed and maintained member-facing features for the Blue Connect application across desktop and mobile platforms serving healthcare members. Contributed to modernization initiatives that improved consistency, usability, and maintainability of user-facing applications through reusable interface patterns and updated design standards.

Web Developer

Immersion Media - *Apr 2016 – Jun 2018*

Partnered with designers and developers to prototype, plan, and deliver experiences across a variety of areas. Developed new features based on marketing requests across multiple projects.

JavaScript Developer

FirstHealth Moore Regional Hospital - *Oct 2012 – Nov 2014*

Built and maintained front-end webpages to main hospital's web application -- known as iForms. Quickly analyzed and proposed iForm solutions to complex workflows to decrease times to order critical medications and tests.
