Experience

Digital Applications Developer
Blue Cross NC - Remote/Durham, NC
Oct 2019 - Present

- Developed and maintained member-facing features for the Blue Connect application across desktop and mobile platforms serving healthcare members.
- Collaborated with design and product teams to translate wireframes and prototypes into production-ready front-end experiences
- Helped modernize legacy functionality through migration to reusable component libraries and updated development frameworks.
- Contributed to UI improvements that enhanced usability, maintainability, and consistency across member-facing applications.
- Authored documentation and development standards to support onboarding and team knowledge sharing.

Web Developer
Immersion Media - Fayetteville, NC
Apr 2016 – Jun 2018

- Worked with in-house designer to translate mockups to functional solutions using full-stack technologies
- Developed new features based on marketing requests across multiple projects
- Collaborated with developers on a consistent basis to delegate work and decrease development time

JavaScript Developer
FirstHealth Moore Regional Hospital - Pinehurst, NC
Oct 2012 – Nov 2014

- Built and maintained front-end webpages to main hospital's web application -- known as iForms
- Quickly analyzed and proposed solutions to complex workflows to decrease times to order critical medications and tests
- Maintained multiple iForms across four hospital environments supporting several departments
- Transitioned several physical documents to iForms, reducing the need for manual workflows

Education

Bachelors' in Computer Science
UNC Pembroke - May 2012
